

Product Data Sheet

Anchor Strop

S0012, S0013 & S0014

The Anchor Strop is made from 30mm heavy duty polyester webbing with two reinforced eyes to allow a karabiner to be passed through.

It is ideal for use on steel structures where a more abrasion resistant, yet flexible, sling is required.

For even better increased abrasion resistance, the Anchor Strop is also available with a protective sleeve.

Specs:

- Rated load 40kN
- Heavy duty polyester webbing
- Individual serial number
- Length variations available on request

Conforms to:

- EN354:2010, EN566:2017, EN795-B:2012 & PD CEN/TS 16415:2013 Type B - 2 person load
