

Product Data Sheet

Dyneema Slings

D8, D11 & D15

Dyneema slings offer a better strength to weight ratio than standard polyester or nylon slings, as well as higher abrasion resistance, and less water absorption.

Available in 8mm, 11mm and 15mm, our Dyneema slings are the perfect choice for those looking to save weight while still maintaining optimal strength and durability for rescue or industrial use.

Sling Lengths: The advertised length of twin eye slings is the working length (measured end to end). The advertised length of circular slings is the circumference – this should be halved to give the working length (measured end to end).

Specs:

- Rated load of 22kN for 8mm & 11mm, 30kN for 15mm
- 8mm: Dyneema. 11mm & 15mm: High grade Dyneema/ polyester mix
- Individual serial number
- Size variations available on request

Conforms to:

- EN566:2017 & EN795-B:2012
