## Kestrel Fall Arrest Harness

H0040

The Kestrel Fall Arrest Harness has front sternal & rear dorsal attachment points for fall arrest connections. We recommend the front be used for fall arrest.

Fitting is normally wrap around but can be left fastened at the chest/sternum connection to give a quicker fitting. Shoulder adjustment buckles use two square link buckles and once adjusted to fit the user will not slip during everyday use.

The leg connection has a choice of buckle fittings - the standard square buckling system, or Quick Clip (QC) buckles. Both come with a heavy duty elastic tidy for any excess webbing to be captivated.

### Specs:

- Rated to: 150kg
- One front sternal attachment point
- One rear dorsal attachment point

### Weight & Sizing:

- Standard size fits: S, M & L
- Weight: 960g

### Conforms to:
