## Raid Sit Harness

H0017

Designed following close consultation with the police and military, the Raid Sit Harness is fully adaptable to any situation. It can be separated into its component parts to be used as a stand alone restraint/ battle belt, or can be used with the legs loops as a standard sit harness.

The closed cell foam padding features a MOLLE compatible PALS panel, this is attached in such a way that allows the main waist belt to be threaded either inside the PALS panel, or outside, depending on the type of pouches being used.
