

Flat Pad Rope Protector

RR019

Our Flat Pad rope protector is manufactured from ultra hardwearing military grade canvas on one side, with high grade, extra thick polyester material on the other, and a closed cell foam core. This combination offers excellent protection against areas of very high abrasion or potentially sharp edges, for example brick/concrete parapet walls.

It has a velcro strip down each side, allowing multiple Flat Pads to be linked together, as well as a cord loop so it can be secured in place.

Specs:

- 30cm Wide
- 50cm Long
- Velcro fastener
- 4mm cord tab
- Orange Polyester
- Olive Canvas
