## KM Pro Rope

RR006

The all new KM-Pro from Teufelberger is a rope specifically manufactured to the needs of the rope access industry and perfectly combines price and performance.

The rope access world requires workhorse ropes with low elongation and high strength but without a “cable” feeling. The 11mm KM Pro’s blend of polyester and Nylon, combined with a time proven construction combination, offers exactly that. This high-performance rope boasts exceptional strength, handling, tenacity, abrasion resistance, and low elongation, all of which come together to give a better rope with longer time in service.

### Specs:

- Material: Polyester/ Polyamide mix
- Static strength: 35kN
- Fig 8: 18kN
- Fig 10: 22kN
- 86g Per Metre
- 32 braids
- 2% elongation
